

Elevate 5 POWERED DESKTOP STUDIO SPEAKERS

Space-saving shielded speakers for your multi-media studio.

Alesis Elevate 5 studio speakers enable you to listen to mixes, masters and multimedia content with impressive clarity and warm, full sound. Built using technology adopted from Alesis award-winning Monitor One and M1Active professional studio monitors, Elevate 5 studio speakers are the perfect way to upgrade your computer or mobile device experience. Elevate 5 speakers bring out every detail of your sound, unencumbered and crystal clear. Their custom wooden cabinets have a dense construction that provides natural bass. Packaged in stereo-matched sets, Elevate 5 studio speakers deliver everything you need, all in one box.

SOUNDSATIONAL

Elevate 5 studio speakers contain powerful, five-inch woofers; crisp one-inch silk-dome tweeters, and dedicated power amps, all housed in custom wood cabinets. These crucial components were carefully selected and tuned to work in concert as a single unit. The result is full lows, clean highs, plus a detailed and compelling stereo image. Magnetic shielding ensures that you'll never have to worry about placement or interference with displays, TVs and other electronic equipment. And unlike passive speakers, Elevate 5 speakers have a volume knob built right in to the front panel for easy control.

All information is preliminary and subject to change.
